

REMARKS

In response to the Action, the applicant elects invention I, the balanced power axoid mechanism of claim 1-6.

However, the applicant believes that the prior term press in claims 7-10 hinders the unity of invention and, therefore, replaces this to show unity in this way as well as the dependence previously presented. Such amendment is non-narrowing and, therefore, does not invoke Festo-like limitations.

Reconsideration and allowance are, therefore, requested.

Respectfully submitted,

William R. Evans
